# HOW SECURE IS YOUR TECH STACK? CHECKLIST

SECURITY CHECKLIST:

[ ] We update all devices and software regularly (at least monthly).

[ ] We use multi-factor authentication (MFA) for all critical systems.

[ ] We keep at least three copies of important data (3-2-1 backup rule).

[ ] We test data backups at least once per quarter.

[ ] Employees are trained in cybersecurity awareness regularly.

[ ] We have a written, tested incident response plan.

[ ] Our Wi-Fi network is secured with strong encryption and hidden SSID.

[ ] Backups are stored in both local and cloud environments.

[ ] We have a trusted IT partner or internal team monitoring our systems.

[ ] We use firewalls, endpoint protection, and real-time threat detection.
